National Academies/NCBI PDF p.67 — Sheldon et al. and ectomorph

CONCLUSIONS

In the frontispiece to their book on human physique, Sheldon et al. (1940) showed photographs of three extremes of somatotype: an endomorph, who was characterized by pendulous fat deposits; a mesomorph, who looked well proportioned and muscular; and an ectomorph, who looked like a victim of anorexia nervosa. There

SAI NSNIS PDF p.20 — ectomorph description
